IDEA BOOKLET

IN-DEPTH TEACHING AIDS INSPIRE UNLIMITED POTENTIAL

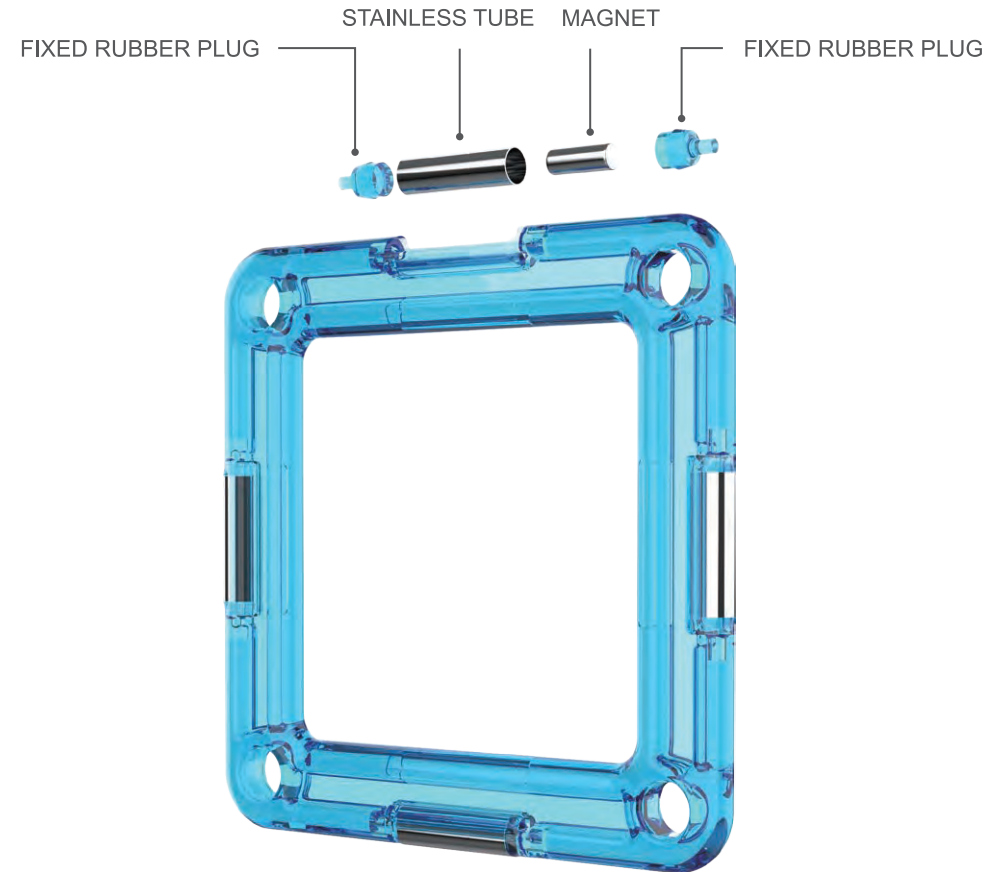

HURTLE Geoworld--The third generation of "Crystal" magnetic stainless series is of greater significance. It is not merely a toy, but also a teaching tool that can help to develop infants' eleven abilities, including expressive ability, sensing ability, imitative ability, discernment ability, attentive ability, sharing ability, observation ability, cooperative ability, memory ability, cognitive ability and self-care ability.

With ultra-strongmagnetism, **HURTLE Geoworld** "Crystal" series can easily help kids make 3D pictures based on their fancy imaginations. The product is rich in shape and easy to play with in sets. Different accessories can form myriads of shapes to stimulate kids desire to explore and seek knowledge so that they could think freely in a space of infinite possibilities.

The **HURTLE Geoworld** magnetic stainless upgrades the 2D space to 3D space, enabling kids to understand the concept of space when playing with it.

The combination of different shapes produces different effects, guiding kids in trying to think from multiple perspectives to develop their logical thinking ability. A variety of shapes look lively and interesting, able to imperceptibly train kids' ability to learn and imitate. Easy to play with, the product arouses kids' keener interest in practicing with hands, so as to help exercise their ability of using the hands, eyes and brain concertedly. The product is made of imported food-grade PC materials in strict accordance with the EU CE Standards, safe, nontoxic and crystal clear; the magnetic stainless, made of a natural material, is never demagnetized, harmless to the human body. The abundant product sets and creative ideas can easily meet the needs of children aged from 3 to 12.

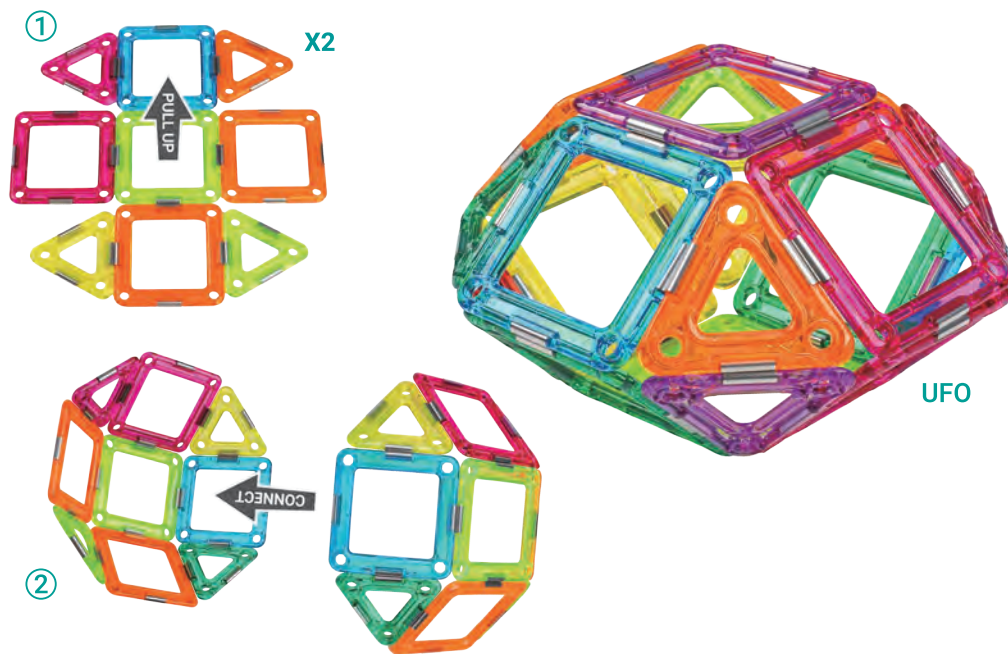

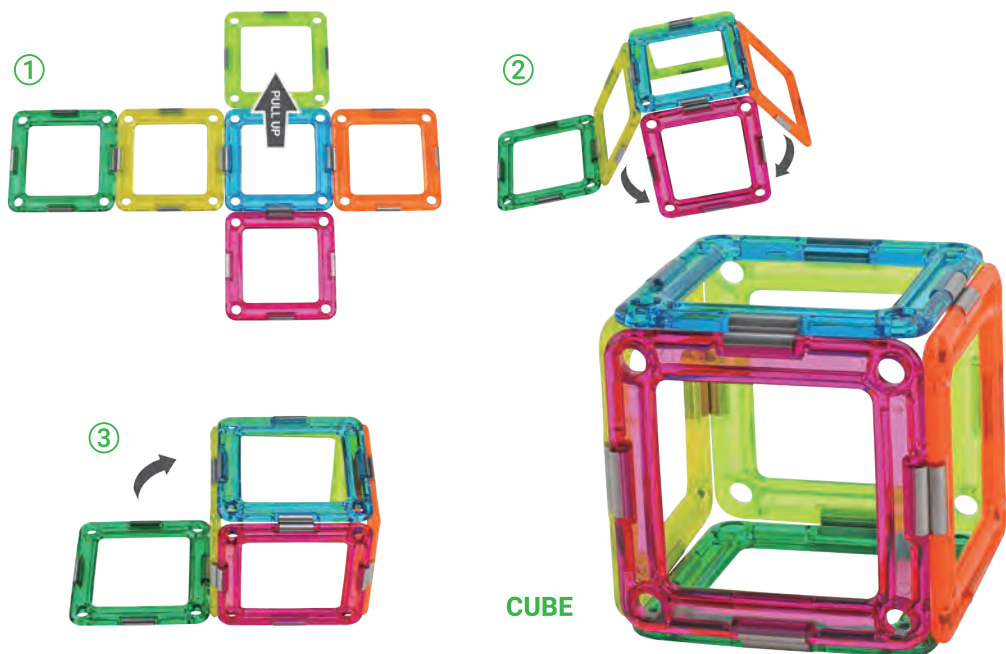

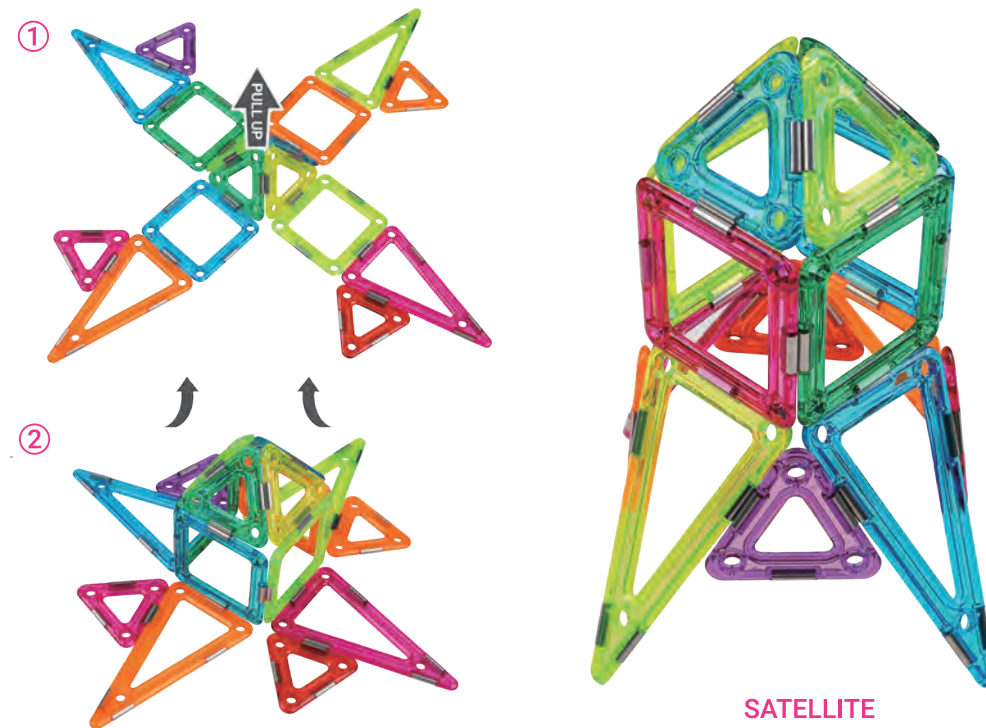

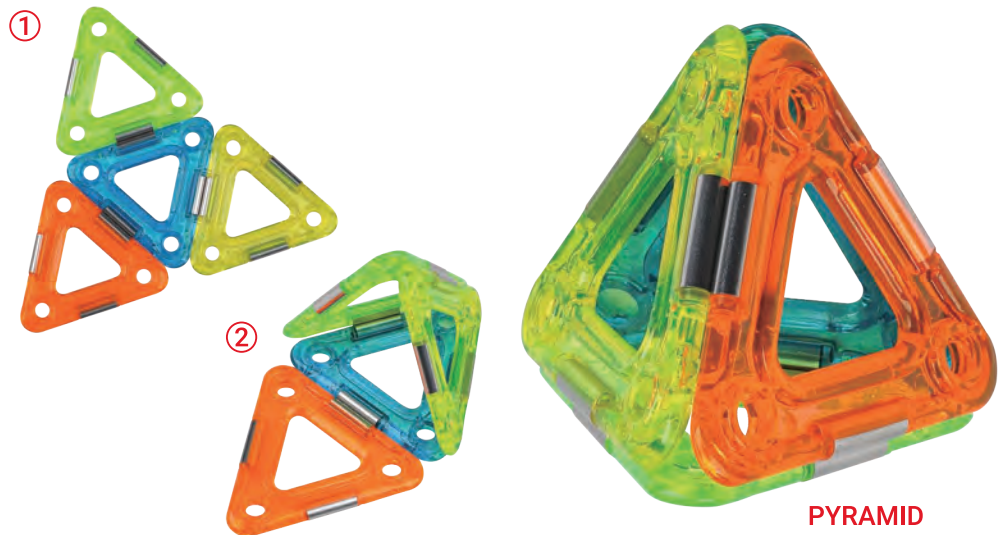

The third generation of HURTLE Geoworld "Crystal" magnetic stainless series, made with integrated molding technology, is lighter and thinner.

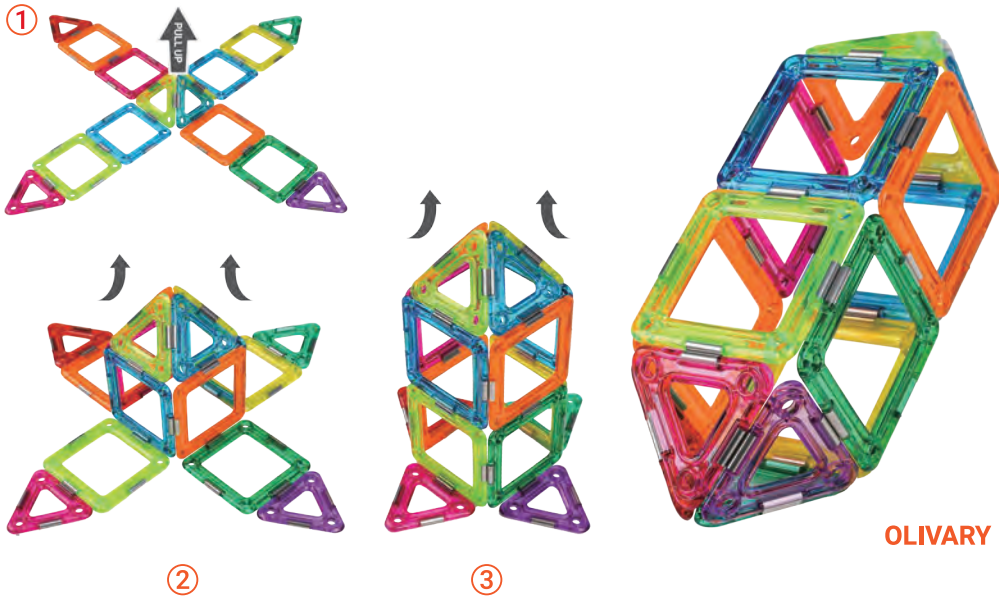

When the third generation of **HURTLE Geoworld** "Crystal" magnetic stainless series is manufactured with integrated insert molding technology, a strongmagnet is first placed inside a stainless stainless tube, which is then stuffed with a cock body on either end and put automatically in the mold for integrated injection molding. The magnet is fixed down with three protective measures, effectively protecting the magnet structure from being damaged and falling off; the magnetic stainless is made of imported quality materials, such as PC and food-grade 304 stainless, under strict production standards, ensuring that the third generation of magnetic stainless is more beautiful and durable.

FIXED RUBBER PLUG FIXED RUBBER PLUG

The fourth generation "HURTLE Geoworld Star Series" magnetic sheet adopts the patented technology of integral injection molding with inserts. In the production process, the powerful magnet is put into the stainless steel pipe and both ends of the steel pipe are plugged with cock bodies. The automatic machine is then placed into the mold for integral injection molding. The triple protective fixed magnet can effectively prevent the magnet structure from damage and falling off. The raw materials of the magnetic sheet are food-grade TPE, 304 stainless steel and magnets which are safe and environmental-friendly. The magnets in the magnetic sheet are made of natural rare earth materials free from demagnetization and harmless to human body. The appearance of the magnetic sheet is in the macaron color system with star decorations, which makes the appearance uniquely beautiful, skin-like and feel good. The modeling is more vivid, lively and lovely.
