

PYRAMID

GROUND LOOP *Isolator*

MODEL: NS-20

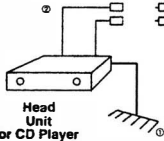

INSTALLATION INSTRUCTION

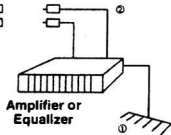

This Noise suppressor eliminates the noise in the audio line without sacrificing the audio high fidelity. Connect your audio components to the Noise suppressor as shown in the diagram.

Note: Do not attempt to connect the Noise suppressor to speaker cable. This noise suppressor is designed for AUDIO SIGNALS only. Do not connect video cables the noise suppressor.

Typical Vehicle Electrical System Connections

Ground Loop Isolator

1. Points of different electrical potential in the vehicle body (multiple grounding points).
2. These multiple grounding points cause currents to flow over the audio interconnect wire shields with resulting noise.
3. The ground loop isolator blocks these currents.
