- 1.** Position the cutting guide against the required speaker placement and trace around.
- 2.** Cut out the traced area using a pad saw or other suitable tool.
- 3.** Take the speaker unit out of the packaging and remove the grille. Connect the speaker wire to the appropriate “+” and “-” connections (select the desired tapping for 70V device).
- 4.** Locate the speaker unit into the cut-out, ensuring that the 4 rotating fixing clamps stay turned inward.
- 5.** Once located, turning the 4 fixing screws clockwise will cause the fixing clamps to rotate outward and tighten onto the mounting surface.
- 6.** Push the speaker grille into place by applying even pressure around the rim.

PDIC63T

6.5" In-Wall / In-Ceiling 70V Speaker

Flush Mount Low-Profile Speaker
with 70 Volt Transformer (500 Watt)

Features:

- In-Wall / In-Ceiling Speaker System
