

PDUSBPP10RD Microphone XLR-to-USB Adaptor

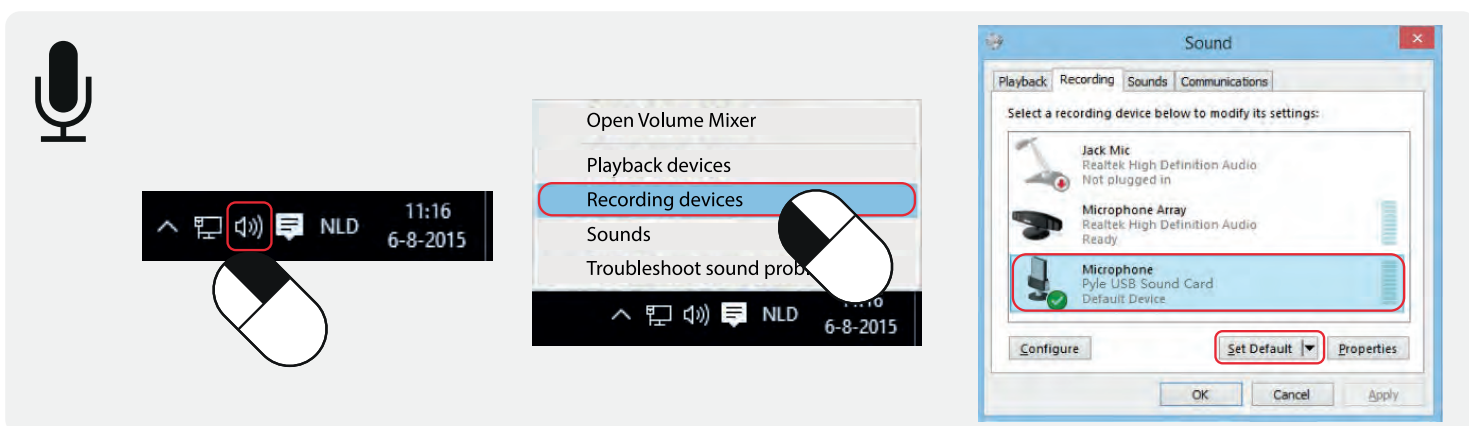

USB Mic Interface with Volume Control, Easy USB Plug-and-Play (+48V Phantom Power)

USER GUIDE

INSTALLATION- WINDOWS 7/8/10

This section illustrates the first step of installation on Windows 7/8/10. It shows a mouse cursor clicking the speaker icon in the system tray. A context menu appears with 'Playback devices' highlighted. To the right, the Windows 'Sound' control panel window is shown with the 'Recording' tab selected. The 'Microphone' device is highlighted, and the 'Set Default' button is circled.

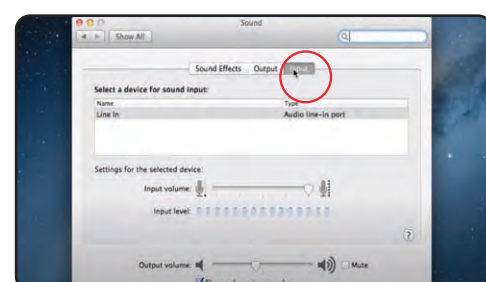

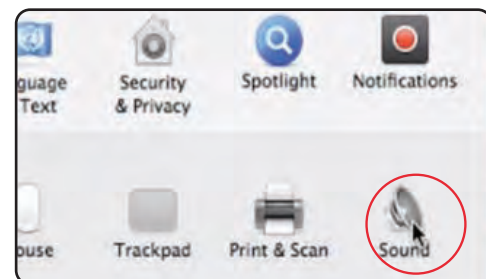

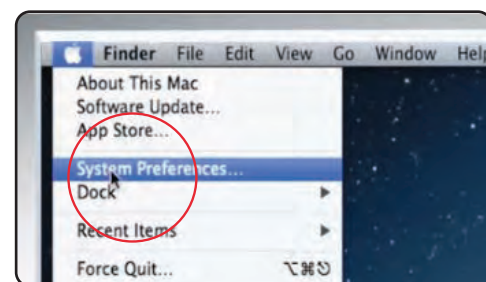

This section illustrates the second step of installation on Windows 7/8/10. It shows a mouse cursor clicking the microphone icon in the system tray. A context menu appears with 'Recording devices' highlighted. To the right, the Windows 'Sound' control panel window is shown with the 'Recording' tab selected. The 'Microphone' device is highlighted, and the 'Set Default' button is circled.

CHANGE SOUND INPUT/OUTPUT ON MAC OS

1. On your Mac, choose Apple menu > System Preferences, click Sound, then click Output.
2. Select the device you want to use in the list of sound output devices.
For any device plugged into the computer's sound port, choose Microphones.
3. Do any of the following to adjust your sound output settings:
Adjust the balance or volume: Drag the volume slider.
Show a volume control in the menu bar: Select the "Show volume in menu bar" tickbox so you can turn the volume up or down from anywhere.

To set a separate volume for alert sounds, click Sound Effects.

VOLUME CONTROL

Mic Volume Control

Mute

Headphone Volume Control
