## **WIRELESS CLIP ON MINI MICROPHONE**

## **OPERATING INSTRUCTIONS**

This Wireless Clip-on Mini Microphone of good quality, will bring you into a world where you can sing happily and freely to your heart's content so that you enjoy it admiringly.

#### **HOW DO YOU OPERATE IT?**

- 1. Open the bottom cover (4) of the transmitter, insert the battery with the correct polarity and close the bottom cover until it clicks to shut.
- 2. Insert the Microphone connector (9) into the socket (1) of transmitter.
- 3. Open the battery cover (5) of the receiver, insert two batteries (size AAA) into the receiver with correct polarity and close the battery cover.
- 4. Plug the receiver into the input socket of the microphone on the amplifier, set both switch (2) of the transmitter then switch (8) of the receiver to ON position, then the pilot light (3) and (7) will turn on that indicates good condition and ready for operation.

### **ATTENTIONS:**

- 1. If the acoustic quality and volume is not normal or receiving distance is shortened, the batteries in the transmitter and receiver should be replaced, if thereafter still not working normal, carefully trim the frequency by adjusting the screw (6) in the receiver with a screwdriver to operate normally.
- 2. If your microphone will not be used for a long period, the battery should be taken out to avoid deterioration and damage of components.
- 3. If two wireless microphones will be used at the same time, you should use them with one red and green light. You can't use the microphone with both the same color.
- 4. If the microphone is too close to the speaker or the volume of the amplifier is too loud, shrill sound will occur that may damage the amplifier or speaker. In that case, please keep the microphone far from the speaker and tone down the volume of the amplifier.

# **SPECIFICATIONS:**

**Modulation** FM

Wireless Operating Frequency 179.4 / 202.8 MHz

Output Impedance 600 ohm

Operating voltage 9V DC for Transmitter

3V DC for Receiver

**Effective distance** 20 m
