6-String Classic Guitar

Guitar Strap and Tuning in

Instructions Manual

Please take a few moments to read through this booklet. In it you will find answers to many of your questions and other invaluable information about how to attach a guitar strap and how to tune a guitar.

Instructions:

A. How to attach a guitar strap?

1. Adjust your guitar strap to the correct size.

2. Take the looped end of your string and thread it through the key hole on the front of your strap, tying a knot close to the hole.

3. Adjust your guitar strap to the correct size.

4. Run one side of the string through the headstock and tie a knot on the other side.

5. Ready to Play now!

B. How to tune a guitar (for first time user)

1. Hold the strings down with your left hand while stretch the strings away from the body with your right. (image 1)
2. Use some pressure to wiggle strings back and forth. You don't need to be gentle but make sure you don't pull too hard once you feel the string resisting or it can break. (image 2)

BASIC RUNDOWN OF TUNING A GUITAR

1. Memorize what the strings are on the guitar. (E – Low version, A, D, G, B, E – High version) (image A, B)
2. Look at the tuners of the guitar. (image C)

3. Pluck the string with a pick or if not with the pick then with your finger and when you move the tuner around, you can hear the pitch get lower. You can turn it the other way and tighten it and you hear the pitch get higher.

4. You can also use clip-on tuners then put on the headstock because it reads the vibration off the guitar and tells what note it is or it's close to.

5. Move the needle of the tuner to get the right tune of the string. If the needle goes too far, bring it back down and even lower than the notes needs to be and then bring it back up until the needle hits the right tune of the strings.

6. Once you've tuned all the strings, there's now more tension on the neck so you can tune all the strings again and then go back to the first string and fine tune it. Go through them all then play a chord which you may or may not know yet. This could be the first thing you're looking at.
