It can be manually adjusted after switching off. It can also open or close the 24-hour system.

Dual HD DVR Camera

- Front camera + Rear Camera,
- Best Parking Assistance For Lady Driver
- These two cameras work as DVR camera as well

Front and Rear dual HD DVR camera

- Dual camera cover both front and rear angle for great protection and peace of mind on the road.
- Monitoring the roads ahead and behind the car simultaneously.
- The videos taken by the rear camera are stored alongside those from the front camera on the memory card for easy access.

Gravity Sensor

With built-in G-sensor, it can automatically detect a sudden shake/collision and lock the footage to prevent the video from being overwritten even in cycle recording. Accident scene can be truly restored.

Cycle Recording

Automatically overwrite the oldest file when the memory disc is full, never need to worry about memory capacity.

24-Hours Parking Monitor

- Parking mode monitors your car's surroundings while car is parked.
- If someone hits your car and impact reaches the G-Sensor, the front and rear camera will turn on and record a short video, then lock and save it, and turn off automatically.

Troubleshooting

Q: Unit doesn't power up.

A: Use a multi-meter to check for 12v+ to red and yellow wires. Check for proper Ground on the Black wire.

Q: My video does not play.

A: Attach "PARK" wire to parking break. When this wire is grounded the video will play
(Grounding trigger of the parking brake)

Q: Reverse camera does not come up on the screen.

A: Attach "BACK UP CAMERA" wire to reverse tail light 12v+ (Make sure camera is and sending video signal)

Q: Can I set up steering wheel control?

A: Key 1 and Key 2 wires need to be wired to your vehicle's steering wheel column

Q: The time I set is not saved after device reboot.

A: Are other settings saved? If not: Check that yellow memory wire is attached to 12v+ constant

A: Turn off GPS auto update

Go to radio settings > Set Time > switch off auto update

Q: My GPS gets no reception.

A: Check if the antenna properly connected.

A: Mount Antenna directly to your vehicle (GPS antenna is to be magnetically mounted, it will boost GPS reception when attached)

A: Check alternate antenna placement to test for interference

Q: How to I set the time?

A: System setting, set time

Q: How do I turn up GPS instruction volume (I Can't hear it over music)

A: Change GPS sound settings

Go to Navi > Settings > Sounds > Set GPS voice level to max > Set radio volume to min (Adjust accordingly)

Q: Where can I download firmware updates?

A: This unit's hardware does not allow it to be updated with new OS or firmware.

Q: How do I play video files? My unit cannot read my digital video files.

A: Make sure SD card is compatible

A: Check file format of your file. (You may need to convert your video file to an alternate file format)

You have entered the 'Touch Screen Calibration Menu'. For optimum touchscreen performance, this feature enables you to enjoy the best functionality of your device's touch screen.

To complete the touchscreen calibration, an "X" will appear in the circles on the screen in numbered order, continue to press the center of the "X" as it passes through each numbered circle.

(In circle number one, you will see an "X", touch the center of the "X", then the "X" will move to circle number two. Continue to touch the center of the "X" as it will move to the other circles in numbered order. If calibration senses an error, the process may restart; Repeat if necessary.)
