Ways to Connect

• Bluetooth Connection

Connect the active speaker to a power source via a 12V cable. Upon successful connection a red light will illuminate in active speaker. Recommend to install a powerswitch and a 10amp fuse between the power and active speaker. Switch on Bluetooth on your phone/tablet and select Bluetooth connection name 'PyleUSA'. Upon successful connection you will hear a connection tone and a blue light will illuminate on active speaker. Conversely upon Bluetooth disconnection, you will hear a disconnection tone and red light illuminates on active speaker.

• Using included speaker wire to daisy Chain connection in between Active and Passive speakers to build up the complete stereo system

• RCA Low level input allow user to have any AUX-IN option additionally while Bluetooth feature is disconnected.

The active speaker stays at green light illumination while RCA AUX-IN. Vice Versa, while Bluetooth is connected, the Bluetooth signal dominates the audio system.

• Optional 'RCA Output' allows user to wire and extend wider audio system.

The added pair is to receive audio signal via 'Low Level Input' and turn Bluetooth pin off on added active speaker to avoid Bluetooth connection confusion. The way of daisy chain connection in between active and passive speaker on added pair audio system is same as above point 2 method. The active speaker on added speaker system stays at green light illumination.

User can use 'RCA Output' and 'Low Level Input' to add up numerous pair speakers to build up optimal audio system for different places.
