- 6) AUX Volume Control
- 7) MIC1 Volume Control
- 8) MIC2 Volume Control

2. Rear Panel

- 1) AC Fuse Socket
- 2) AC Inlet Holder
- 3) 12V DC Power Terminals
- 4) Low Impedance Outputs, 4-8 Ω

3. Features:

This amplifier is designed to act as a public address system. All devices in this series operate on 12V DC. The speaker outputs are 4-8 Ω low-impedance outputs. MIC Input 1 has microphone priority override.

5. Precautions & Warnings:

A. Read all documentation before operating the equipment.

Retain all documentation for further references.

B. Avoid storing or using your equipment at a high temperature, near excessive moisture and/or dust, and near electromagnetic equipment.

C. Your equipment generates heat during use, so please leave at least 4 inches of space clear on the sides and 1 inch of clearance on top.

D. Always operate the equipment with the AC ground wire connected to the electrical system ground.

E. The AC voltage must be the same as specified on the rear of the equipment.

F. Please turn off the power switch before pulling out the power cable.

G. Use a soft, damp cloth to clean your product. Do not use solvents or cleaning chemicals.

6. Power Amplifier Technical Specification

Technical Date
