CAUTION: DO NOT use All in one pest repeller if you have one of the following pet rodents:

- Hamster
- Gerbil
- Guinea pig
- Or any other pet rodent

All in one pest repeller does not wish to harm your pet rodent.

How to use All in one pest repeller

Your pest problem will be remedied with 2-4 weeks however; eradication of all pests may take over 4 weeks depending upon the pest and its reproduction cycle. If your vermin problem is particularly serious. It may take a few more weeks. In addition, to further enhance and secure the safety of All in one pest repeller, the unit has a built in electrical surge protector that will guard against overheating and power surges. NOTE: This does not cover the unit being struck by lightning.

How does All in one pest repeller work

The item transmits ultrasonic (Freq.), dragonfly wings` vibration (Mosquito), electromagnetic wave (Electro-magnetic), Ozone (O3), and Anion (Anion) to repel different pests. Also it can be used as night light (Light). The electromagnetic wave drives pests out from the walls; the ultrasonic drives them from your home; Ozone and Anion can make the air fresh and remove bacteria which attract unwanted pests. When you press "TEST", all the lights (3 lights) will turn on and you can hear sound, so this shows the item works well.

How many All in one pest repeller units do I need

Each unit covers approximately 2,500 square feet / 230 square meters on any single floor of building. It is recommended that one unit be placed on each floor of a multi-story building. We also recommend the unit be placed as centrally as possible in a one story home and that the unit be placed at opposite ends of each alternate floor in multi-story buildings. Because commercial buildings have their wiring installed within metal coverings, one All in one pest repeller is required per floor space up to 1,500 square feet / 132 square meters.

How quickly will I see results

Your pest problem will be remedied within 2-4 weeks.

Note: Vermin activity might increase within the first two weeks of usage. This is normal and will quickly drop in the following two weeks.

All in one pest repeller is your best choice for pest repeller. It is completely safe to use around children, pets and food products. Because it does away with the use of harmful chemical insecticides and pesticides.

A forward looking product for these times All in one pest repeller provides an environmental risk free solution to vermin and pest repeller by making use of the electrical wiring within the walls of any building to effectively free your home, office or buildings of pests.
