2. Make the switch on the position of "MOSQUITO I", and the unit will imitate the ultrasonic sound of male mosquito I. The indicator button lights up in green.
3. Make the switch on the position of "MOSQUITO II ", and the unit will imitate the ultrasonic sound of male mosquito II. The indicator button lights up in red.
4. Make the switch on the position of "DRAGONFLY", the unit will imitate the sound of dragonfly wing`s vibration to repel the mosquito. The indicator button lights up in both.
6. After continuous use of 7-10 days, there will be no mosquito indoor.

PRINCIPLE

1. In science, it is proved that the female mosquitoes bite human or animals to feed their spawn only when they are in their propagating period. At this time, they hate to meet male ones. According to this principle, the product is designed to drive the female mosquito by imitating the sound of the male ones.
2. Dragonfly is the natural enemy of mosquito. This product can imitate the sound of dragonfly wing`s vibration to drive all kinds of mosquitoes.

ATTENTION:

1. Please use the unit about 1-1.5m above the floor. It would reduce the impact of repelling mosquito if too high or too low.
2. Avoid the straight block in use. Because it can reduce the impact of mosquito repelling.
3. Don`t make the product head with doors or window. It will have best effects under enclosed spaces.
4. Long and continuous use of the product, you will achieve the desired results.

Technical Data:

- ✧ Rating: 1W
- ✧ Frequency: dragonfly- 38.4HZ
Mosquito I& II- 15K-20KHZ
- ✧ Voltage: AC 110-240v 50-60 HZ

Can Be Used In:

- Homes and Apartments
- Food Service Outlets
- Businesses
- Farm Buildings
- Kennels and Stables
