Safety Warning

To avoid being electrocuted, do not open this equipment unless you are a professional technician.

Exposed part of the equipment which is not isolated contains dangerous voltage harmful to the body. Users are advised not to freely open the casing.

When breakdown appears and requires maintenance, please get qualified repair personnel to carry out servicing, or contact supplier of this unit. When special component marked  in the unit needs to be replaced, the replaced component must be the same in model and specifications with the original.

This equipment should not be exposed in water-soaked area; articles filled with liquid, such as flower vases, should not be put on top of the equipment.

Features of this Unit

Excellent Functions

- Luxury Aluminum and Fashionable Ultra Slim Panel Design.
- Full Function Micro-CPU Controlling System.
- Professional Digital HI-FI Stereo Tuner System, Excellent Sensitivity.
- Manual/Auto/Direct Radio Station Select Modes, Easier Operation.
- Unique Channel Overview Function, 60 Radio Stations Pre-set and Stored by CPU, Never Lose.
- 12-Hours: Clock Display, Timer Open/Sleep, 4 Alarms.
- Full Function Infrared Remote Control.

Notice of Use

■ Safety Notice

- In the event of alien objects or liquid is found in the casing of the unit, Immediately pull the power plug and call for professional maintenance personnel for inspection before reuse.
- ! Non-professional personnel are not advised to open the casing of this unit to avoid electrocution.
- When abnormal situation is detected when the unit is working (such as smoke, extraordinary smell and noise being detected from inside the unit), pull the power plug immediately, and seek professional repair personnel to carry out servicing.

■ Power Notice

- Before operating this unit, please check that its voltage is the same as local voltage. Voltage of this unit is indicated on the power cable at the back.
- When this unit is not used for a long period, please remove the power plug of the unit from the power socket.
- While removing the power cable please grab the plug of the power cable instead of the lead. Avoid power cable being stepped on or squeezed. Do not forcefully twist the power cable.
- When it is necessary to change power cable of the unit, please seek service from qualified maintenance centers.

■ Safety Notice

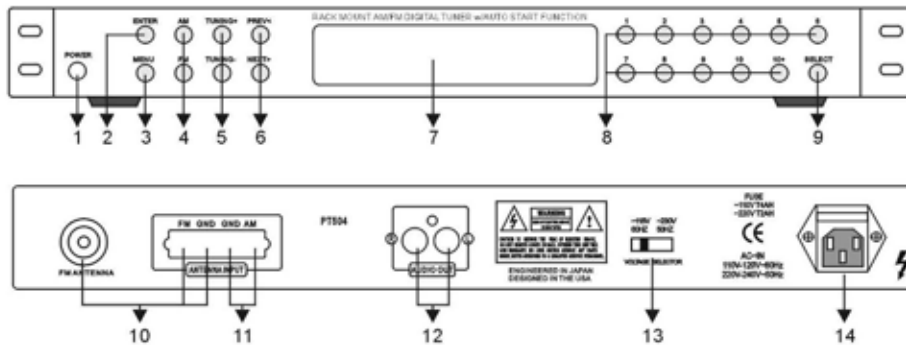

- This unit needs to be placed in well ventilated area to prevent overheating of internal parts which may shorten its lifespan. When it is placed on rack or inside a box, sufficiently large vent is required to increase heat sink.
- Do not place this unit near heat sources or allow it to be directly irradiated by sunlight, dusty places or areas with mechanical impact.
- ※ To avoid fire or electric shock, do not place the unit under humidity or allow it to be caught in the rain.
- Do not place articles on top of the unit as this will block the vents and affect heat sinking effect.
- Do not allow needles, coins and other metallic objects to fall into the unit and damage the unit.

Setup of Panel & Back Panel Functions

The back inputs and outputs have been adjusted to perfect the quality of setup and integration. The company has made this unit stand alone when it comes to Professional Digital Tuners.

This Digital Graphic Tuner is using microcomputer technology, which not only confirms the perfect audio effect, but also makes the colorful graphic spectrum more beautiful. The perfect combination of technology and music will give you the best entertainment.

Phenomenon	Reason	Solution
No power supply after turn it on	<ul style="list-style-type: none">● The plug hasn't be connect in order.● Have turn the POWER ON	<ul style="list-style-type: none">● Check the power wire and plug it again tightly.● Press Power button to turn it on.
Have power supply index, but there're no any sound come out.	<ul style="list-style-type: none">● Haven't been connected well● Signal input mode mixed● Master volume is in the minimum position● In MUTE status	<ul style="list-style-type: none">● Connect the units in right way● Select the right input mode● Turn up the master volume● Press MUTE on the remote control to cancel mute status
No reaction for operation or abnormal displaying	<ul style="list-style-type: none">● Encounter pulse interfering caused CPU problem	<ul style="list-style-type: none">● Shut the system OFF and turn ON again minutes later.
No reaction for remote control operation.	<ul style="list-style-type: none">● Battery problem● Remote control hasn't aim at remote receiver● There's barrier between remote control and system	<ul style="list-style-type: none">● Change battery● Aiming remote control to receiver window position on the system.● Remove the barrier
Unusual noise	<ul style="list-style-type: none">● Signal cable hasn't well connected.● There're other machine working nearby. Such as generator, dryer...	<ul style="list-style-type: none">● Connect the cable accordingly and strongly.● Shut down the other machine.
Low sensitivity	<ul style="list-style-type: none">● Antenna are hasn't well connected.● In MONO mode	<ul style="list-style-type: none">● Check/well connect/adjust the antenna.● Select STEREO mode

If the machine still in malfunction status after you finished the aforesaid steps, you should asking a technician to repair it. Do remember never repair it by yourself.

Major Technical Specifications

Frequency range: AM 530kHz-1620 kHz

FM: 87.5MHz-108MHz;

Input Impedance: 1K Ω

S/N rate: MW: \geq 40dB

FM: \geq 45dB

Sensitivity: MW: \leq 5mV/m

FM: \leq 20uV

Output power: 500mV rms

Power consuming: 10W

Power Supply: AC-115V/60Hz
AC-230V/50Hz

Notice:

1. Subject to Change without Notice.
