PTVSP30SL
Wireless TV Speaker
2.4GHz Bed-Side TV Comfort Hearing System

PTVSP30SL 2.4GHz Wireless TV Speaker adopts Frequency Hopping Spread Spectrum technology (FHSS) with strong anti-interference ability. It can bring the clear and crisp TV sound, creating comfortable individual listening environment. It provides more freedom to enjoy TV programs or other audio devices indoor or out doors. No need to turn up volume aloud, there is no lip-sync delay and no need to use heavy headphones.

Features:

1. As a wireless speaker, compatible with any brand of TVs that have Digital Optical or RCA (Red and White) or 3.5mm AUDIO OUTPUT .
2. 2.4GHz digital stereo wireless speaker adopts advanced Frequency Hopping Spread Spectrum technology (FHSS), with strong anti-interference ability; wireless transmission distance is more than 30 meters without obstacles.
3. Built-in optical digital converter function, compatible with TV 's digital audio out, helps you to enjoy top quality audio experience without spending extra expensive cost on the digital converter.
4. Two power adapters available: one for transmitter base power supply; another for speaker to be plugged in the wall outlet, no need taking the speaker back into the basement to charge.
5. With volume adjustment and 3 levels of tones control enhance clarity of TV speech.
6. This product can be used in one to one (one transmitter to one wireless speaker) or one to many (one transmitter to multiple wireless speakers at the same time).

7. Built-in short-circuit protection circuit in the transmitter for safety.

8. Automatic power OFF function:

Power saving design that turns **OFF** automatically when no signal is received for 3-5 minutes.

9. The big knob with one dial operation of ON/OFF and volume control in the center area of the receiver, makes you turn up / down or turn off the volume by your fingertips easily.
10. Rechargeable and portable wireless speaker with handle, convenient to take anywhere.
11. Big size acoustic chamber with powerful loudspeakers (2 x 5 Watt)
12. **Audio signal automatic level control function:** transmitter will reduce the intensity of the input audio signal when it is too strong, avoid excessive sound that may damage your hearing
13. **Wired stereo speaker function:** speaker receiver with audio IN jack is a wired speaker for MP3, PC, Mobile Phone, iPad, etc
14. Speaker receiver has a audio out jack to connect with a headset that makes it great for you to watch TV quietly even the TV is at mute condition.

Charging your TV speaker before first use

Place the **RECEIVER** on the **TRANSMITTER** and charge for 2~3 hours until the charging indicator of the RECEIVER is OFF which means the battery is full.

Connect the power adaptor to the **RECEIVER** to charge the battery.

Low Battery and Recharging:

The red and green LED blink alternately and an alert sound occurs when the receiver is in wireless state, or the red LED blinks when the receiver is in the wired state. The battery power is lower at this moment. Recharge the battery until full.

Operation

After connecting the **TRANSMITTER** to your TV, or other audio device:

1. Turn **ON** your TV, or other audio device, and set the volume properly. Then switch **ON** the **TRANSMITTER**.

2. Turn **ON** the **RECEIVER**, and set the volume and tone (**HIGH/MID/LOW**) to your required level.

3. After using, turn **OFF** the **RECEIVER** and switch **OFF** the **TRANSMITTER**.

CONNECTION:

Built-in optical digital converter function, compatible with any brand of digital TV. Helps you enjoy top quality audio experience without spending extra cost on digital converter.
