How to Play

WiFi Streaming Receiver is a device that receives Internet streaming music or other wireless music, and multiple receivers can be combined to a Zone to play same music synchronously.

1. Find a USB battery charger which usually your phone have one, the power can be 5V/1A or above, connect the battery charger, USB cable and receiver to power on.

2. Connect a smart phone to a WiFi.

3. Connect the receiver to the same WiFi which the smart phone connected. Download smartsonix APP, and the APP will guide you to finish the connection.

4. Play Music

A. Iphone: play music on the phone, open Airplay to choose a receiver, then the music will send to the receiver.

B. Android phone: open a music player with DLNA like BubbleUpnp, choose a receiver as a render, then the music will send to the receiver. Also can use smartsonix APP to play.

5. Zone building: Use the smartsonix APP to build zones freely, the APP will guide how to operate the easy operation.
