Ultralight Sleeping Pad + Carrying Bag

Lightweight, & Compact Sleeping Mat for Backpacking,
Hiking Air Mattress

serenelife™

HIKE *M* CAMP USER MANUAL

Methods of Inflation

Easy Blow Up Technology: Open the gas nozzle and inflate with your mouth (easily in under 60 seconds). Tighten the gas nozzle after the inflation is complete. You can also adjust the hardness as you wish: if it is over inflated, you can open the gas nozzle to deflate air, tighten the gas nozzle after that; if it is under inflated, you can open the gas nozzle, inflate with your mouth until the hardness of air bed is moderate. Finally, tighten the gas nozzle.

Method of Deflation

Open the gas nozzle, roll up the air bed from the end without gas nozzle, deflate the air and tighten the gas nozzle. You can repeat the above steps; deflate the air in the bed as completely as possible in order to get a smaller collection volume.

Storing Your Sleeping Pad

1. Lay flat the air bed and open the gas nozzle to inflate the air bed, preserve it in a cool place.
2. Be sure to preserve the air bed in the state of inflation in order to ensure that the elasticity of stretch cotton will not be impaired if it is left unused for long time.

Cleaning Your Sleeping Pad

Tighten the gas nozzle after it is inflated; clean it with a soft brush and neutral detergent. After that, flush it with clean water. Finally, preserve it after it is dried naturally.

Notes:

1. Please place it in a place out of the pets' reach.
2. Please do not use the air bed as buoyant apparatus.
3. Keep it away from flame or hot objects; do not exposure it under sunlight for long time.
4. Please put protection cloth under the air bed if it is not used in tents to protect it from puncturing by sharp plants or debris.
5. Please do not put an inflatable air bed which gas nozzle has been tightened in a car or tent under sunlight to prevent the air bed from being damaged by over inflation.

Features:

- Packs into Small Bag for Easy Carry
- Heavy-Duty Ripstop Nylon Fabric
- Tear Resistant and Deflation Proof
- Portable, Lightweight, Flexible and Noise-Free
- Sturdy and Waterproof Outer Liner
- High-Quality Materials, Great for Hiking
- Easy to Clean, Warm, Comfortable and Washable
- Perfect for Camping, Backpacking, Hiking, Traveling and More
- Designed for Couple, Family, Adults, and Teens

What's In The Box:

- (1) Ultralight Sleeping Pad
- (1) Carrying Bag

Technical Specs:

- Thick Sleep Support: 2.7" -inches
- Construction Material: 20D Ultralight Nylon Fabric
- Max. Load Capacity: 400 lbs.
- Product Dimension:
Rectangular Style: 75" x 26" -inches
