

SLHT39

Reliable Spring Steel Blind

Person Hunting Ground Blind, Includes Carrying Bag

serenelife™

Assembly Instruction

Shoot thru mesh is intended for use with archery only. Please only use fixed blade broadheads as opening or mechanical broadheads can deploy prematurely when shooting thru mesh.

WARNING:

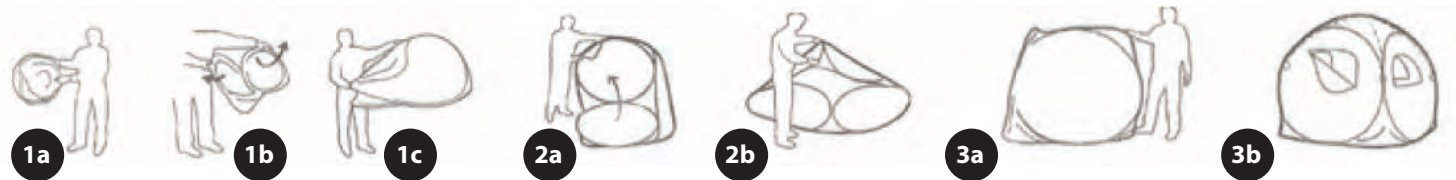

Blind is made of steel compressed in coil form. Blind is under tension and will 'spring' to shape when released. Use both hands on blind and firmly hold blind when unfolding away from your body.

WHAT'S IN THE BOX:

- Spring Steel Blind
- (8) Stakes
- Carrying Bag
- (2) Elastic Cord Poles
- (4) Ropes

ASSEMBLY

1. Hold Blind with both hands and pull the folded frame apart.
Blind is under tension and will 'spring' open with some force. Direct away from body
2. Lay blind on the ground and open by spreading sections apart.
3. In upright position, take assembled elastic cord poles and located webbing loops in corners of interior of blind.
Slide pole end into one loop and then locate webbing loop at opposite corner. You will need to play a small amount of tension on blind roof with pole. Complete both poles and tie poles together at roof top with sewn in tether.
4. Stake ground blind down as needed with stakes and guide lines.

TAKEDOWN

Blind should only be stored when fully dry. Although blind to dry completely before takedown and storage.

1. Remove all stakes, disassemble poles, and close all doors and windows. Lay blind on side and fold panels together.
2. Pick up Panel while folded together, place bottom on the ground and fold the top edge down until it meets the bottom edge, forming a 'bun' shape.
3. Hold top and bottom edge by stepping on them. Practice caution as blind will be under tension
4. The two edges of the 'bun' shape will be bowing upwards. While continuing holding your foot in place, grab and take the top of each end with your hands and pull them toward the center. One side will overlap the other.
5. Hold both sides with one hand. Slowly remove your foot and take control of bottom edge with your hand, pulling them together.
6. Blind will compress ready to be placed in storage bag.

FEATURES:

- Durashell Plus
- Spring Steel Frame
- Tension-relief Zipper Design
- Easy to Open/Close
- Spring Steel Blind with One Door, One Large Window and 2 Small Windows
- Windows Zipper Ties Only Inside
- Door Zipper Ties on both Sides
- Durable and Lightweight Spring Steel Blind
- One Person Hunting Ground Blind
- Durable Polyester Fabric
- Reinforced Corners for Extra Durability
- 2 Layers of Black PU Coating
- Reliable and Easy to Set Up and Take Down
- 140 Denier Thread in Both Horizontal and Vertical Weave
- Triple Stitched Corners and Reinforcements to Prevent Rods Popping through the Fabric

TECHNICAL SPECS:

- Construction Material: 150D Camo Polyester with 2 Layers of Black PU Coating
- Ground Stakes (D x L): 0.16" x 7.5" -inches, 8 pcs.
- Hunter Capacity: 1
- Product Dimension (L x W x H): 60" x 60" x 64" -inches
