Premium Raised Air Bed

Elevated Inflatable Twin Air Mattress with Built-in Pump,
Upgraded Bed for Home Camping and Travel

USER MANUAL

For better protection of this product, never unfold or inflate the airbed in temperatures below freezing, avoid extensive exposure to the sun and protect from contact with sharp objects and rough ground.

Make sure to handle the pump with care. Avoid pounding and jumping to prevent damage to the airbed material.

SETUP OPERATIONS (Before inflating, Plug into AC Power outlet.)

1 Turn Comfort Adjust Dial to desired firmness level.

2 Turn Inflate/Deflate Switch clockwise to "Inflate" position to turn on Setup Pump and inflate air bed. Setup Pump will automatically turn off upon reaching selected firmness level and Inflate/Deflate Switch will automatically return to "Off" position.

CONSTANT COMFORT PUMP OPERATIONS

1 Constant Comfort Pump is a fully automatic pressure maintenance pump that is designed to operate silently so that it will not disturb your sleep when it automatically turns on to re-inflate. Pump will automatically turn on when air pressure inside air bed drops below a predetermined low pressure level. Pump will automatically turn off upon reaching selected firmness level (firmness determined through adjusting the Comfort Adjust Dial).

2 To ensure that Constant Comfort Pump will operate, please make sure to plug power cord into 120V AC electrical wall socket.

3 To turn off Constant Comfort Pump auto inflate function; turn Comfort Adjust Dial to "Off" position. Constant Comfort Pump will not automatically turn on regardless of air pressure inside air bed.

TAKEDOWN OPERATIONS

Turn Comfort Adjust Dial to "Off" position so Constant Comfort Pump will not automatically turn on.

Turn Inflate/Deflate Switch counter clockwise to "Deflate" position for complete air removal. Upon complete air removal, Setup Pump will automatically turn off and Inflate/Deflate Switch will automatically return to "Off" position. Place power cord into Cord Storage Pocket for storage.

IMPORTANT SAFETY INSTRUCTIONS

When using an electrical furnishing, basic precautions should always be followed, including the following:

READ ALL INSTRUCTIONS BEFORE USING.

DANGER- To reduce the risk of electric shock. Always unplug this appliance from the electrical outlet before cleaning.

 0-15 Months	⚠ WARNING
	Risk of Suffocation <ul style="list-style-type: none">• Infants have suffocated on inflatable mattresses. Never place infant aged birth to 15 months to sleep on this inflatable air mattress/air bed. Infant can suffocate on an under-inflated or deflated mattress, on bedding, by co-sleeping with another person, and by entrapment between the mattress and bed frame or between the mattress and a vertical surface.• Children can be entrapped between the inflatable mattress and an adjacent vertical surface.• Provide at least a shoulder width space between the inflatable mattress/air bed and adjacent vertical surfaces such as walls, dressers, or other objects.• Always keep the inflatable mattress fully inflated when in use.

WARNING- To reduce the risk of burns, fire, electric shock, or injury to persons:

1. Unplug from outlet before putting on or taking off parts.
2. Close supervision is necessary when this appliance is used by, or near children, invalids or disabled persons.
3. Use this appliance only for its intended use as described in this manual. Do not use attachments unless recommended by the manufacturer.
4. Never operate this appliance if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged or dropped into water, return to a service center for examination and repair.
5. Use this appliance on the floor only. Do not attempt to use on a bed frame or other raised surface.
6. Keep the cord away from heated surfaces.
7. Never operate the appliance with the air openings blocked. Keep the air openings free of lint, hair and the like.
8. Never drop or insert any object into any opening.
9. Do not use outdoors. For Household Use Only.
10. Do not operate where aerosol (spray) products are being used or where oxygen is being administered. Keep the pump away from flammable liquid. The area where the pump is used should be well ventilated.
11. To disconnect turn all controls to the off position then remove plug from outlet.

12. To reduce the risk of electric shock, this appliance has a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way, if the plug does not fit fully in the outlet, reverse the plug. If it still does not fit contact a qualified electrician to install the proper outlet. Do not change the plug in any way.
13. It is not recommended to plug into the 120V power source unattended when not in use.
14. Do not obstruct ventilation hole on pump.
15. Do not open the pump case-electrical hazard may result. No user serviceable parts.
16. Do not over-inflate.
17. For proper Setup Pump usage, it is recommended not to exceed 5 minutes of continuous inflation/deflation time.
18. In case the pump overheats due to excessive continuous inflation/deflation, the power will automatically cut off and reset to begin working within 30 minutes.
19. A fire may occur if this devices touches or is covered by flammable material, including curtains, draperies, walls, etc., when in operation.
20. **DO NOT** place any flammable material such as paper, cardboard, plastic on the pump.
21. **DO NOT** operate the pump in enclosed spaces that are not well-ventilated.
22. **DO NOT** operate in the presence of explosive and/or flammable fumes.
23. **DO NOT** place any part of the pump or cord in or under water or other liquid.
24. **DO NOT** leave device unattended when in operation.
25. Do clean airbed with only damp cloth soaked in mild soap and water.
26. The Maximum Weight Capacity for the Queen Size is 500 lbs. Full size is 500 lbs and Twin size is 350 lbs.
27. Do not use near people using or wearing medical devices.

SAVE THESE INSTRUCTIONS

SERVICING OF DOUBLE-INSULATED PRODUCTS

This appliance is double insulated. In a double-insulated product, two systems of insulation are provided instead of grounding. No grounding means is provided on a double-insulated product, nor is a means for grounding to be added to the product. Servicing a double-insulated product requires extreme care and knowledge of the system, and is to be done only by factory qualified service personnel. Replacement parts for a double-insulated product must be identical to the parts they replace.

NOTE: Airbed material may stretch during first use and may need additional air to reach desired firmness. Air inside of bed may expand and contract with varying temperatures potentially leading to reduced pressure inside of the bed. If this occurs, simply add more air using the built-in pump to achieve desired firmness. For better protection of this product, never unfold or inflate the airbed in temperatures below freezing, avoid extensive exposure to the sun and protect from contact with sharp objects and rough ground. Make sure to handle the pump with care.

CARE AND MAINTENANCE: Clean airbed with only damp cloth soaked in mild soap and water.

REPAIRING (Repair kit included): First, deflate the bed by following the instructions for deflation. Clean and repair the affected area thoroughly. Cut a piece of clear patch material (included in the repair kit) into a size that will cover the puncture. Apply the self-adhesive patch over the affected area by peeling off the backing and placing sticky side down on airbed. Rub patch to ensure adhesion. Allow four (4) hours for repair to set before attempting to inflate the airbed. Any other servicing is to be performed by an authorized service representative.

IMPORTANT SAFETY INFORMATION AND WARNINGS

Adult supervision required for setup. Warning this is an electrical product. To avoid risk of fire, burns, injury, and shock, it should not be played on or placed near where small children can reach it. Do not use in or around water. Not to be used outside, this bed is for indoor use only. The bed should be placed in an open area before use. Making sure there are no sharp objects, steps, drops, or breakable objects in the area. Unplug when not being used.

SLABTW53

18" Twin Premium Raised Airbed

Elevated Inflatable Twin Air Mattress with Built-in Pump, Upgraded Bed for Home Camping and Travel

Features:

- Great Spare Bed For Out-Of-Town Guests
- Soft, Plush Flocking Helps Keep Sheets In Place
- Made of Sturdy PVC
- A comfortable high-quality flocked sleeping surface
- Quick And Easy To Inflate, As Well As Easy To Clean And Maintain
- Convenient Spare Bed For Camping, Out-Of-Town Guests And More
- Raised 18" From The Floor
- Built-in Constant Comfort Pump
- Built-in High Output Pump
- Enhanced Coil Technology

Technical Specs:

- Material: Sturdy PVC & flock top
- PVC Thickness: 0.4mm
- Deflated size: 73" x 38" x 17" -inches
- Inflated Size: 75" x 40" x 18" -inches (± 1.25)
- Weight Capacity: 375 lbs.
- Height: 18" - inches

What's in the Box:

- 18" Twin Airbed
- Electric Pump
- (2) Repair Patch with Adhesive
- Storage Bag
