ASSEMBLY INSTRUCTIONS & LAYOUT
Please Note:
- Be sure to check the letters marked on the sides of the bin and align as shown in the images for proper orientation.
- Reference the images on the corresponding page!

1. Lay the bottom of the bin down and start by adding in the side plates.
   - You will feel the plastic latch engage when the sides are firmly pressed into place.

2. Add 3 screws each side to secure in the side plates.

3. Now we add the front and back plates.
   - First align the front and back plates with the side plates in the "Y" direction, and push down latching onto the base.
   - Then push in to secure the latches in the "X" direction latching to the side plates.

4. Add 3 screws on each side to secure in the front and back plates to the bottom panel.
   - Add 4 screws (See second image) in the corners to securely attach the front and back plates to each side plate.

5. Align the hinge of the lid and attach with 2 screws on each side.

6. Set your own password following instructions below.

HOW TO SET A CUSTOM PASS CODE:

1. Adjust the pin to your current pass code (By default, the lock pin is set to "0000").

2. Completely remove the top drawer from the cabinet and on the inside of the cabinet switch the lever located on the lock from the B to A position.

3. While lever is in A position - set the desired new code. Make sure the 4 dials you set are exactly parallel and lined up - you don't want to set to the wrong number by mistake! (Sample below).

4. Once your new pass code is entered, change the lever back from A to the B position.

5. Make sure to write down & remember your code! There is no way to recover it once it is set!
