Mummy Sleeping Bag + Travel Pillow w/ Compact Compression Sack
4 Season Sleeping Bag for Adults & Kids, Lightweight Warm, and Washable,
for Camping, Hiking Traveling

HIKE *M* CAMP USER MANUAL

This type of sleeping bag comes shaped like a mummy where the sides taper and narrows as you come from the top to the bottom side. This sleeping bag is ideal for camping in very cold temperatures as its shape helps conserve energy by ensuring that only a small space requires heating. Having a small space requiring heating ensures that this type of bag is very warm compared to other shapes such as the rectangular sleeping bags.

How to use Mummy Sleeping Bags?

Using a mummy sleeping bag is quite easy. If you got the liner then pop it over the camper mat. After that, pop out your sleeping bag from the sack and keep your legs flat when you're entering inside the bag there afterward, when you lie down, put your head inside the hoodie and close the sleeping bag upward towards your head. That's it! Now you're ready to enjoy the heat retention in a mummy position.

Cleaning your Mummy Sleeping Bags

If your bag is losing loft and is darkened with grime, then by all means give it a full washing. First, look to see the washing label instructions on the bag. Follow those instructions.

1. Use a soft brush, sponge, or a cloth with warm water when cleaning stains and spots on the sleeping bag. Keep in mind that the sponge needs to have a smooth surface, and the brush used should have all its bristles functioning to prevent any damage to the mat's external material. Mild washing liquid and detergent can be used in cleaning stains that are more stubborn.
2. Rinse the sleeping bag thoroughly and avoid using any aggressive agents such as chlorinated and vinegar cleaners. They smell very bad and end up damaging the sleeping bag's outer material.
3. Dry the sleeping bag on either a shade or at room temperature. Speeding up this process using a clothes dryer, hairdryer, or direct sunlight can damage the sleeping bag. While the sleeping bag might dry and be ready for use in a few hours, one should allow it more time to dry if he or she is not planning on using the sleeping bag anytime soon.

SLSRT5 - Real Trees

SLSCA5 - Camouflage

SLSGR5 - Green

Features:

- Portable and Lightweight
- Soft 210 Thread Count
- Anti-Snag Zipper
- Opens on One Side
- Designed for Extreme Weathers
- Sturdy and Waterproof Outer Liner
- High-Quality Materials, Great for Hiking
- Easy to Clean, Warm, Comfortable and Washable
